

**Q: Windows Features message shown about .NET framework during installation of Sage UBS 2015 in Windows Server (for this example: Windows Server 2012)?**

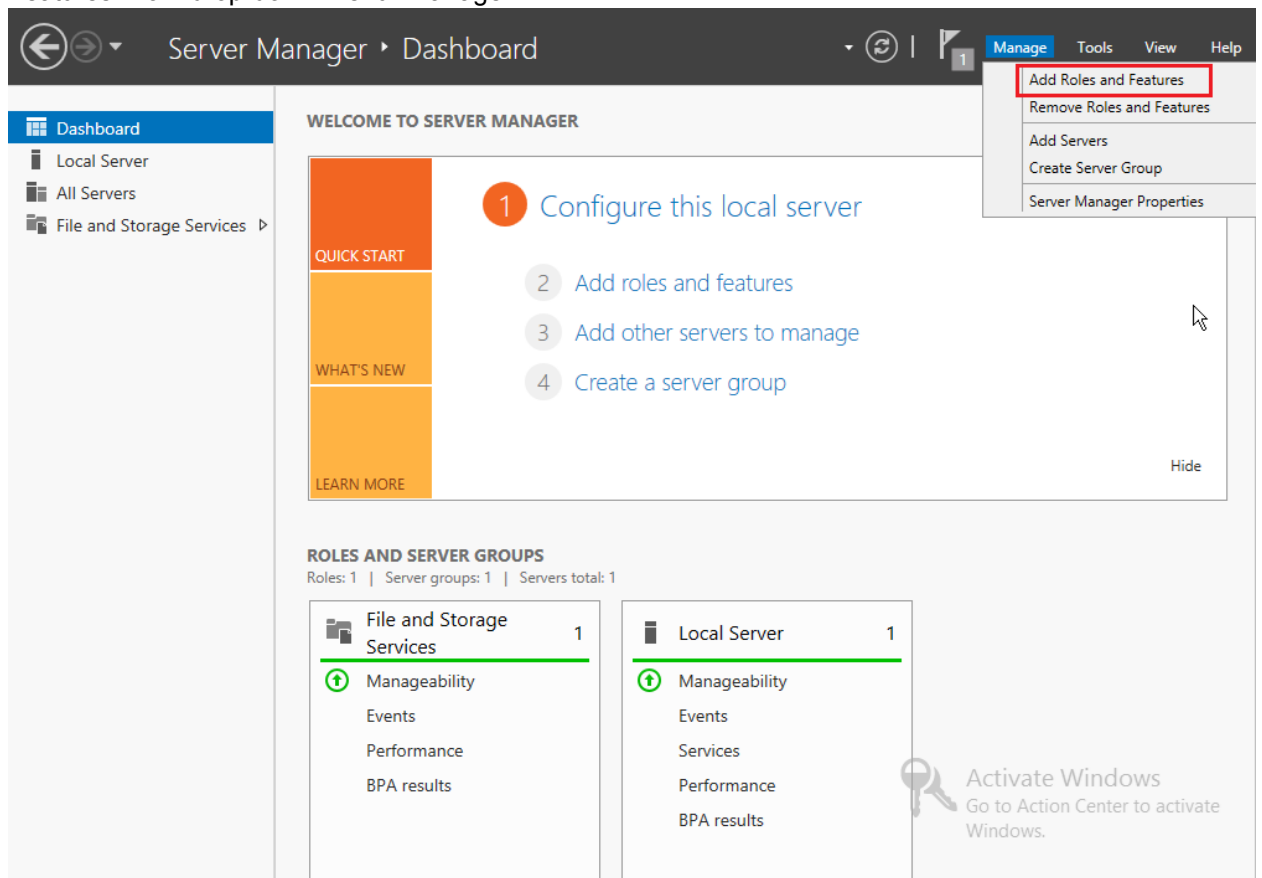

1. During installation of Sage UBS 2015 in Windows Server environment, if the following Windows Features message box shown (due to the server doesn't have the said .Net Frameworks installed before this), just click "Close" button as highlighted in red.

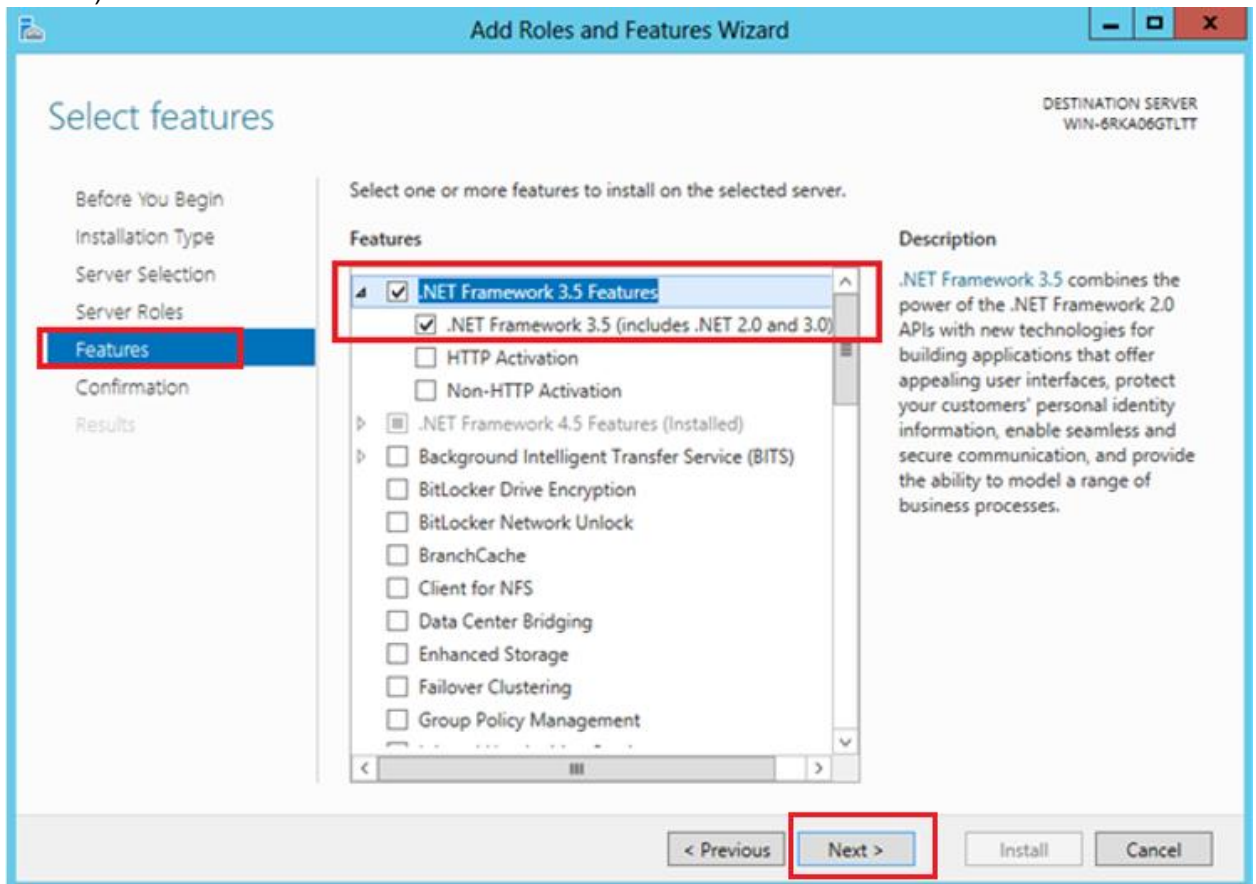

2. After that, next message box would show up as below, just click “No” to cancel the installation.

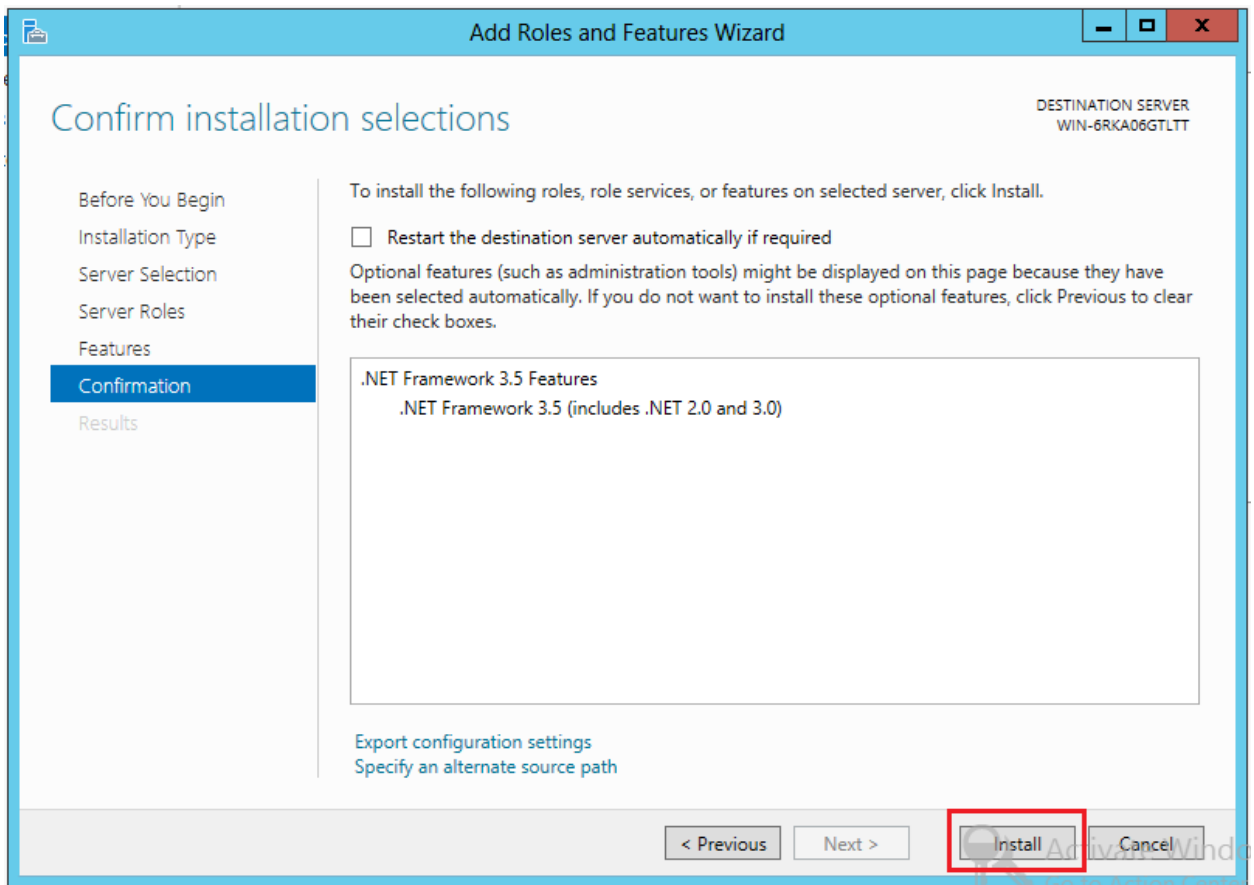

3. Open up the Server Manager from the Windows Server as below, click on “Add Roles and Features” from drop-down menu “Manage”.

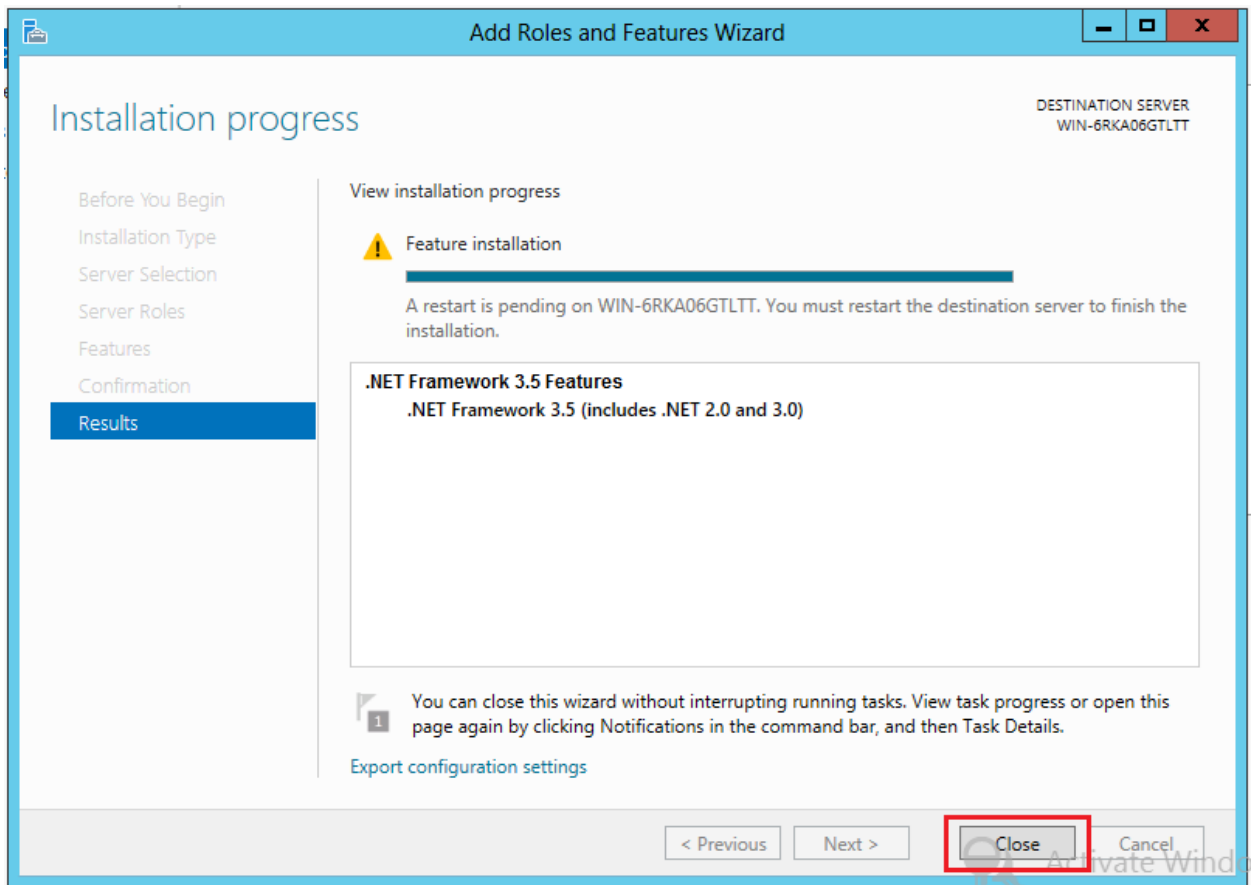

4. In the “Add Roles and Features Wizard”, click on “Features” at the left panel, check/tick the option “.NET Framework 3.5 Features” as well as “.NET Framework 3.5 (includes .NET 2.0 and 3.0)”. Click “Next” to continue the feature installation.

5. In the following screen, click "Install".

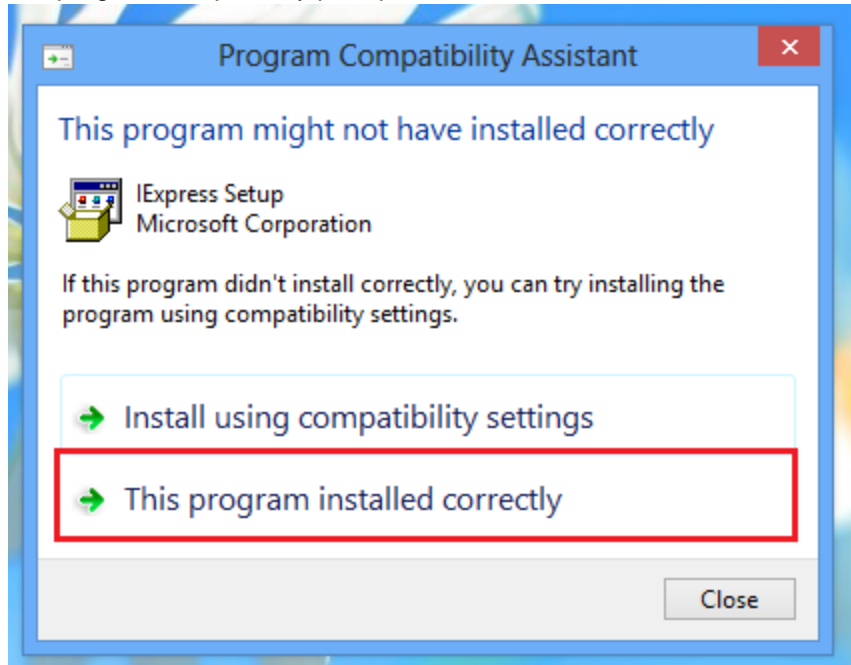

6. Once the .NET Framework installed successfully, click "Close" to proceed.

7. Execute Sage UBS 2015 installer again to perform product installation.

**Q: Program Compatibility Assistant message prompted about the “IExpress Setup” during product installation in Windows 8?**

1. During Sage UBS 2015 installation for .NET Framework (2.0, 3.0 and 3.5) in Windows 8, the installer would prompt the message as below, click “This program installed correctly” to avoid this program compatibility prompt.

2. The installer would continue to run until finish.
