Please take note that Windows will automatically restarts once the update is completed

Issues that have been addressed		
No	Case ID	Brief Description
1	354-144330	<p>Longer time taken when generating GAF file</p> <p><b>Solution : Optimize the function in order to reduce the time when generating GAF file.</b></p>
2	354-146654	<p>Under server environment, client machine is linked database with server machine, but client machine is considered as slow to sign in into server after clicked I&amp;B.</p> <p><b>Solution : New flow is added in order to handle this issue. Instead of auto refresh in Inventory and Billing GST dashboard, user will now need to refresh manually.</b></p>
3	354-146789	<p>Even though there is valid license for Inventory &amp; Billing, but unable to log into I&amp;B module if Accounting license was expired due to data files upgrade is required from Accounting module.</p> <p><b>Solution : Regardless valid or non-valid license in Accounting module, if there is valid license in I&amp;B, system should allow to log into I&amp;B.</b></p>
4	354-146907	<p>When do a sales transaction using a GL account that is mapped as OTHER INCOMES, it will be duplicated in GAF File.</p> <p><b>Solution : No duplicate record for the mentioned transactions to be shown in GAF file</b></p>
5	378-149155	<p>Error message "Variable 'TYPE' is not found" shown when importing the generated glpost9.dbf from SagePayroll</p> <p><b>Solution : Change on the checking flow. System will still allowed to proceed if field is not exist in SagePayroll but in SageUBS.</b></p>
